JOURNAL OF MOLECULAR LIQUIDS

VOL. 39 CONTENTS NOVEMBER 1988

(Abstracted/indexed in: Chem. Abstr., Curr. Contents Phys. Chem. Earth Sci.)

Special Issue: Molecular liquids and molecular interactions. A collection of invited papers in honour of Professor W.J. Orville-Thomas

Molecular dynamics computer simulation of the rod-like molecule methyl hexa-tri-yne: comparison with Doi/Edwards and Frenkel/Maguire theories
M.W. Evans, G.C. Lie and E. Clementi (Kingston, NY, U.S.A.) 1

The statistical correlation between rotation and translation in a dilute gas
M.W. Evans (Swansea, Gt. Britain) and G.J. Evans (Aberystwyth, Gt. Britain) 25

Dielectric relaxation in mono alkyl ethers of ethylene glycol at microwave frequencies
H.D. Purohit and R.J. Sengwa (Jodhpur, India) 43

On the quantum character of molecular motion in liquids at standard conditions
C.A. Chatzidimitriou-Dreismann (Berlin, F.R.G.) 53

The discovery and classification of new laboratory frame cross correlation functions
M.W. Evans, G.C. Lie and E. Clementi (Kingston, NY, U.S.A.) 63

Theoretical studies on liquid phase: molecular properties of pure liquids. Application to carbon tetrachloride
L.M. Sesé (Madrid, Spain) 69

Rotational relaxation and dephasing of diatomic polar molecules in rare-gas liquids
S. Velasco, A.Calvo Hernandez and J. Guemez (Salamanca, Spain) and J. Perez (Tenerife, Spain) 93

Comparison between two models (stochastic and dynamics) calculations for the far-infrared spectra of a HCl–Ar solution
A. Calvo Hernandez, S. Velasco and J. Guemez (Salamanca, Spain) and D. Luis (Tenerife, Spain) 99

Raman spectral study of solutions of $LiClO_4$ and $Sr(ClO_4)_2$ in some organic solvents
M. Lalić, M. Jeremić, A. Antić-Jovanović and V. Bojović (Belgrade, Yugoslavia) 105

Solvent influence on the ν (C=O) band shape of ethyl acetate
A. Hernanz (Madrid, Spain) 111

Relationship of normal modes and local modes to normal coordinate treatment of liquid water
B. Gellai (Budapest, Hungary) 115

Temperature dependence of lattice and defect properties of MgO and Li_2O
W.C. Mackrodt (Runcorn, Gt. Britain) 121

Spin–lattice relaxation and chain dynamics in polymer solutions
T. Tabak (Pavia, Italy) 137

Quasi-crystals and Penrose tiles
S.J. Abas, J. Rangel-Mondragon and M.W. Evans (Gwynedd, Gt. Britain) 153

The Costa Ribeiro effect and allied phenomena
A. Dias Tavares (Rio de Janeiro, Brazil) 171

Conformational change, fluctuation and drift in biological macromolecules: an empirical Langevin approach
A. Cooper (Glasgow, Gt. Britain) 195

Cooperative phenomena and artificial intelligence
R. Serra, G. Zanarini and F. Fasano) Bologna, Italy) 207

Solvent-induced vibrational population relaxation in diatomics: the role of the physical parameters of the system
J.K. Rudra and M.F. Herman (New Orleans, LA, U.S.A.) 233

Solvent dependence of vibrational frequencies and linewidths of the ν_1 mode in group IVA methylmetal trichlorides
A.A. Rodriguez and M. Schwartz (Denton, TX, U.S.A.) 253

Some concepts and models in liquid state chemical reaction dynamics
S.A. Adelman (West Lafayette, IN, U.S.A.) 265

Band shape analysis of the absorption bands of four triphenylmethane dyes using a self starting routine
R. Menzel and W. Kessler (Berlin, F.R.G.) 279
